DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group 1 claims 1-25 in the reply filed on 12/22/2008 is acknowledged with appreciation. Claims 26-27 have been withdrawn from consideration. However, due to a series of species contained in the application a further election of species is respectfully requested.

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I: Figures 1-2, 4-12 and 15

Species II: Figures 3

Species III: Figures 13-14

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 3728

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. The claims are deemed to correspond to the species listed above in the following manner:

Species I: Claims 1-25

Species II: Claims 1-22 and 24-25

Species III: Claims 26-27 (Claims already withdrawn with the previous restriction requirement)

The following claim(s) are generic: Claim 1.

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The unifying technical feature appears to be the opening features on the flap, however this feature is not new (see Auclair (US 5,738,273), which discloses the unifying technical features, see figure 1). The prior art discloses the first and second upper flap, bottom panel, series of fold lines and opening features on the flap. As the unifying feature does not define over the prior art, it cannot constitute a “special technical feature” within the meaning of PCT Rule 13.2; therefore unity is lacking.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 3728

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
